

SIES Graduate School of Technology
Department of Computer Engineering
List of Experiments
FH 2026

Course Code: CEL701

Course: Machine Learning Lab

Course In-charge: Dr.Aparna Bannore/Dr.Rizwana Shaikh

Class/Sem: BE/VII

Lab: 06

Lab Outcomes: At the end of the course, the students will be able to	
LO1	To implement an appropriate machine learning model for the given application
LO2	To implement ensemble techniques to combine predictions from different models.
LO3	To implement the dimensionality reduction techniques.

Expt No.	Aim of the Experiment	LO Mapped
1	Simple Linear Regression	LO1
2	Multiple Linear Regression	LO1
3	Multivariate Linear Regression	LO1
4	Logistic Regression	LO2
5	Ensemble Learning: Random Forest	LO2
6	Ensemble Learning: Adaboost	LO2
7	Support Vector Machine (SVM)	LO2
8	Graph based clustering: Divisive Clustering	LO2
9	Model based clustering: Expectation Maximization Algorithm	LO3
10	Dimension Reduction Method: Principal Component Analysis (PCA)	LO3
